CLEAR RAY 1500

WWW.MEDLINKIMAGING.COM

Presenting the most customizable, feature-rich
veterinary x-ray system currently available on the
market...The durable, highly adaptable

Clear Ray System

High-End Materials

Manufactured from high-quality anodized aluminium, the Clear Ray's sturdy column can be adjusted to fit low ceilings

Functionality

Our unique omni-directional table design is the most versatile floating table currently on the market, with the greatest lateral range

Silent

Rubber-cushioned feed reduce noise and minimize vibration, providing better operational quality

Light-Weight

By reducing waste present in our competitors' designs, we achieved the lightest over-all design, reducing shipping costs and keeping your budget in mind

Silent

Solid anchor points hold the entire system firmly in place to ensure smoother operation

Ease-of-Use

Foot controlled, one-touch function for easier animal management and image capture

Made Locally, Supported Locally

Our competitors' products are built-and supported overseas. That can result in unnecessarily long waits for parts and service.

With the Clear Rays' All American design, construction and support, we are always local when you need us!

It's About Saving Time

Every aspect of the new Clear Ray Veterinary System was designed by veterinarians with over 25 years of experience.

The easy-to-use Clear Ray System takes advantage of new technology to help make doing your job easier, faster and better overall.

AVAILABLE OPTIONS

The Clear Ray Veterinary System is unique in the market for its unprecedented customizability, making it highly adaptable to any veterinary environment. These are some of the custom options available with this groundbreaking new system:

- ✓ Customizable table Width & Length dimensions
- ✓ Certified and non-certified LED/LASER collimator
- ✓ Fiber Resin Table Top
